Subject: West Update

Subject: West explosion late Friday PM

Update. We opened most the water meters in zone 2. (Oak st to Spring street) and believe the meters still off are vacant at this time. We have begun cutting off meters in zone 3. (Everything north of spring st.) Over the weekend we will be working to asses the damage to this zone and begin pressure testing the area with the assistance of TEEX and TCEQ folks. The wells will be evaluated on Monday and we hope to have identified water main problems in zone three by then.

Also, we will remain under boil order until zone 3 has been cleared. Any leaks, stop ups or out of water calls can be directed to me. (Waco Staff)
